TRUTH TOOL COMPANY MANKATO, MINNESOTA

Factory and Home Offices

Truth

Special tools for the garage mechanic is the foundation of our business. The highest grade of tool steel is used in the manufacture of Truth Tools.

Our constant thought has been the building of better tools from year to year and in purchasing Truth Tools you are securing the experience gained in a period of more than thirty years.

New tools are added to the Truth line only after careful thought and study show a real need for such; and no tool will ever find its way into the Truth family that does not measure up to our high standard of quality—for Truth and quality must go hand in hand.

GUARANTEE

Any tool found to be defective or in any way not entirely satisfactory will be replaced without question. Tools in need of repair will be retempered and redressed without charge when returned to our factory at Mankato, Minnesota.

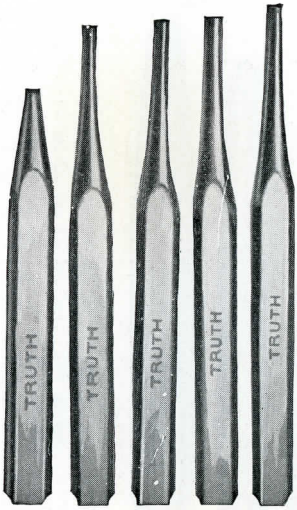
Kit No. 3 Polished in kit		$3.50
Kit No. 3 Unpolished in kit		2.90

Pin Punches



Great care has been taken in manufacturing these pin punches. Pin punches are generally put to abusive use on frozen pins. A starter punch goes with the set; it is made with a short, quick taper. This will start any frozen pin up to ¼-inch in size. Starter punch is excellent insurance for your pin punches.

Sold Singly

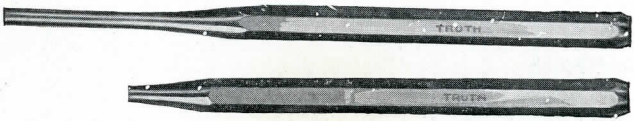
Wrist Pin Wrench		1.75	28

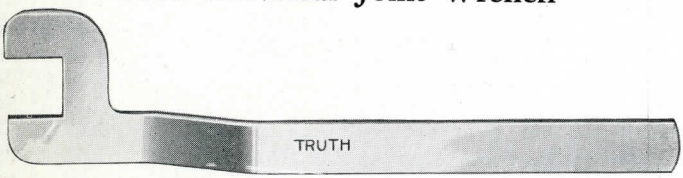
Ford Universal Pin Punch Set



Many times universal pins are frozen to the extent that very few punches will drive them out without bending or breaking; however, a strong starter punch will generally start them and the long punch will follow through without being damaged. This universal set consisting of starter punch and pin punch will take care of the larger percentage of universal pins.

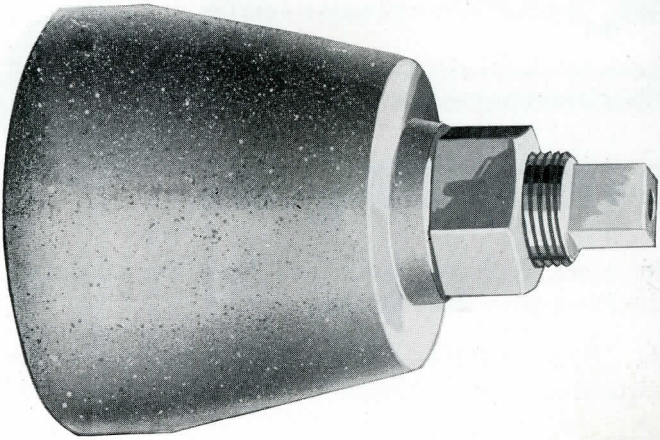
Starter Punch	$0.80
Pin Punch	.80
Kit No. 7 Two Punches in kit	1.50

Ford Universal Joint Wrench



Price $1.05

Ford Universal Joint Pin Shearer

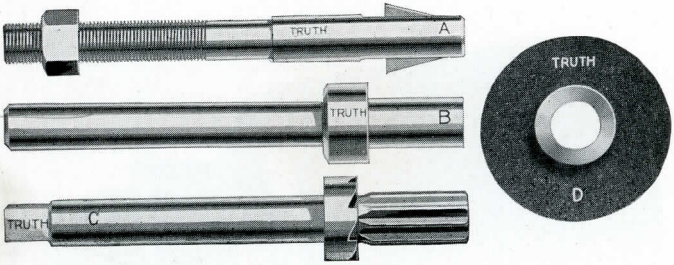


In extreme cases where universal pins are frozen tight it takes considerable time even for a starter punch to start them. This universal joint pin shearer screws on the end of the drive shaft and by screwing the nut against the cup it will shear the universal pin. The cup will work in connection with our Hyatt sleeve tool and customers having one don't need the entire tool as cup is sufficient.

Price, Cup **$1.40**

Price, Cup and Screw **2.50**

Ford Babbitt Bushing Set



Removes, replaces, reams and faces the bushing in the Ford drive shaft housing.

A. Bushing Puller. Push through bushing so jaws expand and catch behind it. Fits both car or truck.

Price $3.00

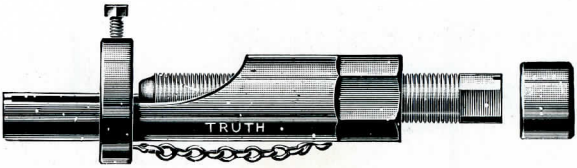
B. Bushing Punch. Replaces both car and truck bushings.

Price $1.50

C. Bushing Reamer and Miller. Made from extremely high grade steel, tempered and ground. Collar D acts as guide in holding reamer in perfect alignment.

Price, Car Size	$6.00
Price, Truck Size	7.00
Set of three tools, Car Size	9.50
Set of three tools, Truck Size	10.50
Complete Set, Car and Truck Sizes	16.00

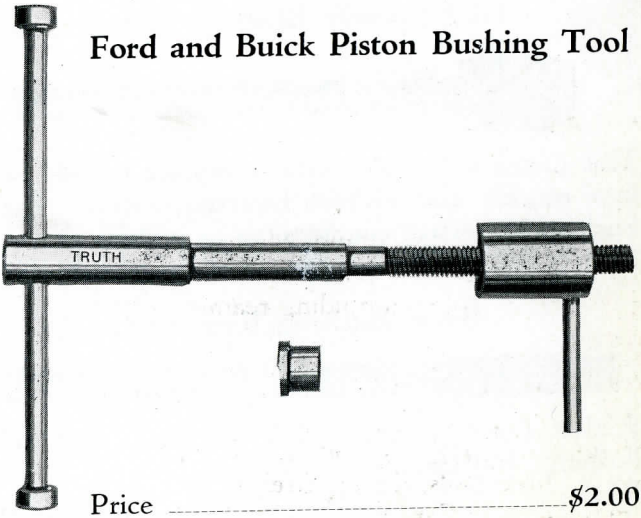
Ford Hyatt Sleeve Tool



Removes and replaces Hyatt sleeve on drive shaft. When replacing sleeve an ordinary ball thrust should be used between hexagon nut and sleeve. Oil should always be used freely on screw of this tool when pulling and replacing sleeves.

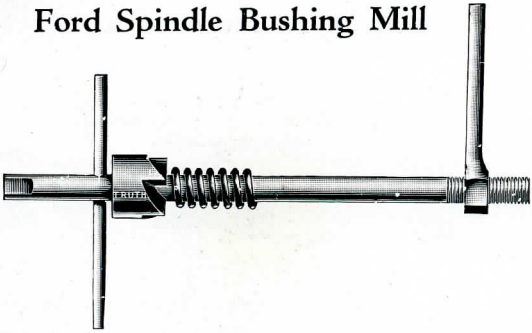
Price $7.25

Ford and Buick Piston Bushing Tool



Price $2.00

Ford Spindle Bushing Mill



Spindle bushings should be faced. This tool will do the job quickly and effectively. Extra miller may be bought separately.

Price $3.00
Extra Miller 1.00

Ford Spindle Bushing Punch

This punch will enable you to replace spindle bushings quickly and without battering them. Leaves bushing in perfect condition to be milled.

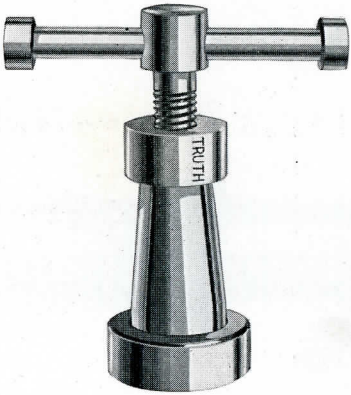
Price $0.85

Ford Bushing Extractor

Perfect for extracting spindle bushings, fan pulley bushings and spindle arm bushings.

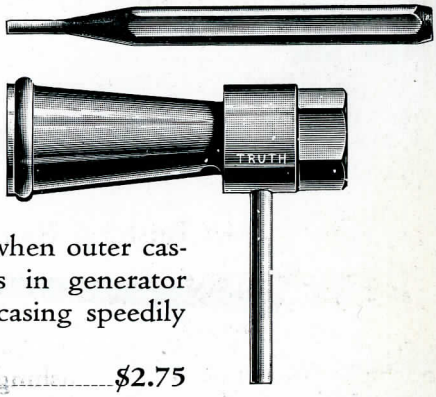
Price $1.50

Ford Inner Generator Race Puller



Pulls the part of race which sticks in generator shaft.
Price $3.00

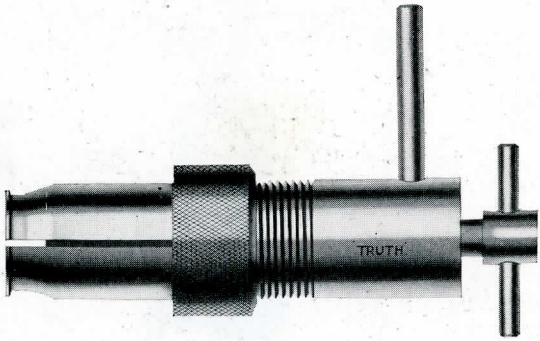
Ford Outer Generator Race Puller



This tool is ideal when outer casing of race sticks in generator cover. Removes casing speedily and without fail.
Price $2.75

Set of two tools $5.50

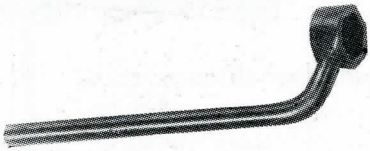
Ford Roller Bearing Puller



Made in two parts; as these are screwed together the flanged end expands and it holds perfectly in the roller bearing. This type of puller never fails to pull the bearing either on car or truck.

Car Size $2.00
Truck Size 3.00

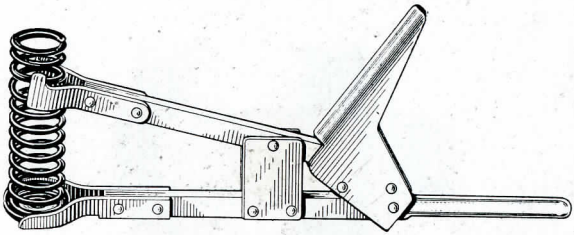
Ford Bolt Holder



Holds head bolts when removing nuts from bolts that hold motor to crank case.

Price $1.00

Ford Valve Spring Compressor



Jaws open and ready to compress

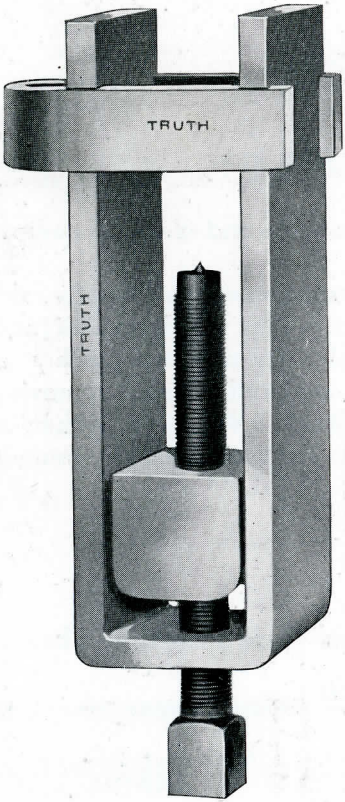
Valve spring compressors are rapidly taking the place of valve lifters. This tool is so designed that all the valves and valve springs can quickly and easily be removed and replaced without removing the carburetor or manifold. Weak or broken valve springs may easily be replaced without removing the head of motor.

Price **$1.60**

Ford Rear Axle Housing Sleeve Pullers

Car size	**$3.90**
Truck size	**4.20**
Set of two	**7.85**

Ford Perch Remover

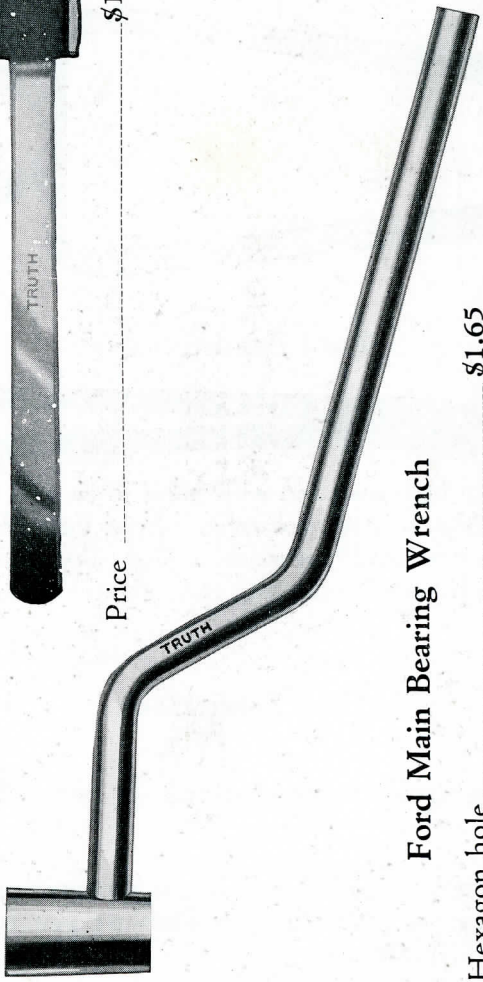


Yoke made of 3/8 inch x 2½ inch steel. Tool has a 5/8 inch screw with a 2 inch screw block. Practically indestructible.

Price $5.75

Ford Fan Pulley Wrench

Price $1.00

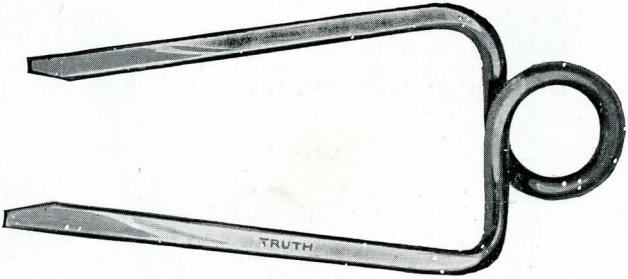


Ford Main Bearing Wrench

Hexagon hole $1.65

Square hole 1.65

Ford Band Clamp Tool



Price $0.60

Ford Band Shears

This tool in connection with band hook and hacksaw will enable mechanics to replace Ford bands from old type to new in 20 minutes. Also good for cutting strap iron when unloading cars, as well as brake lining, etc.

Price $3.50

Ford Band Hook

When replacing new type bands this tool will reach in, engage in hole of band, enabling you to pull it around in place.

Price $0.60

Hack Saw

All steel frame; to work in tight places. Excellent for cutting low speed shaft on Fords.

Large Size, 10 inch blade	$1.25
Midget, 6 inch blade	1.00

Milflex Hack Saw Blades

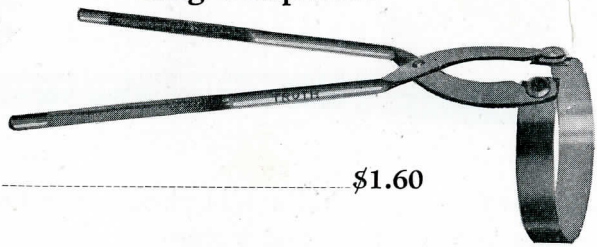
Ford Cap Screw Wrench

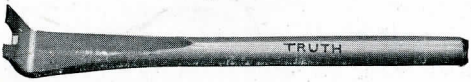
Price $1.75

Ring Compressor



Price $1.60

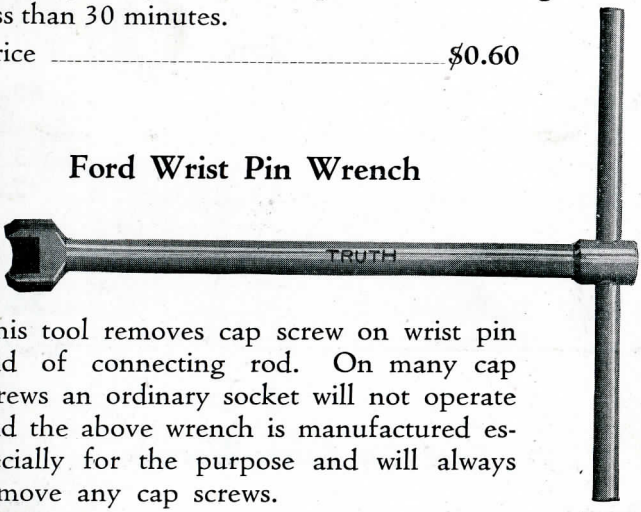
Ford Expansion Tool



This tool releases the pressure on wrist pin and enables a mechanic with the aid of the wrist pin wrench and ring compressor, to replace a connecting rod in less than 30 minutes.

Price $0.60

Ford Wrist Pin Wrench



This tool removes cap screw on wrist pin end of connecting rod. On many cap screws an ordinary socket will not operate and the above wrench is manufactured especially for the purpose and will always remove any cap screws.

Price $1.75

Buick Tools

		Price	Ills'd
Bushing Extractor		$2.00	32

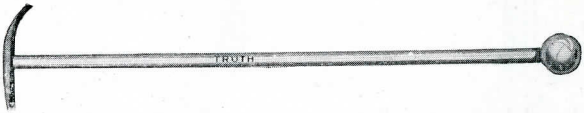
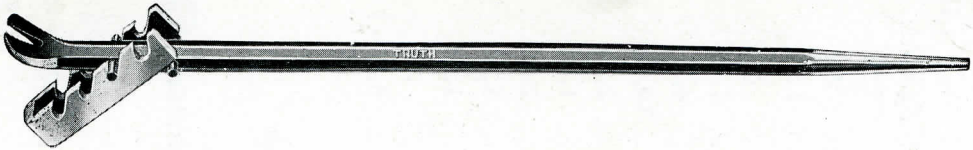
Buick Carbon Scraper



A perfect tool for scraping carbon on motor heads; gets into crevices easily and proves a great time saver.

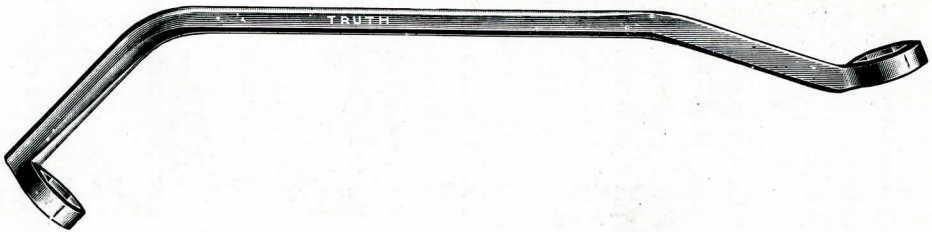
Price $0.90

Buick Cage Lifter



Price $3.50

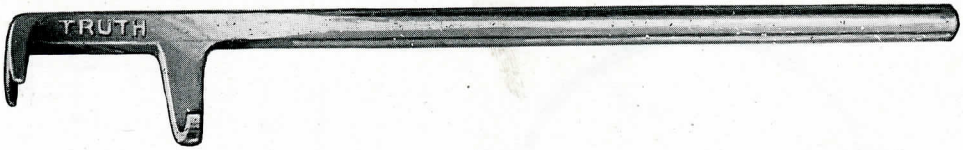
Buick Head Bolt Wrench



Price $2.25

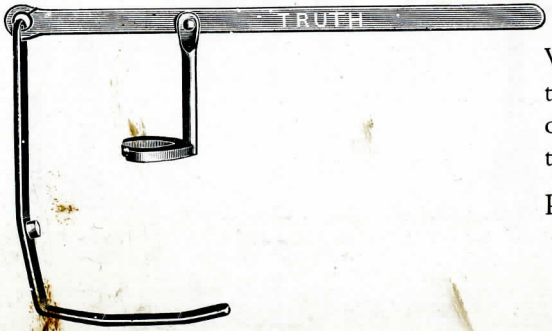
COWDEN TRUTH TOOLS
TRUTH TOOL COMPANY

Rocker Arm Lifter



Price (Fits All Over-Head Valves) $1.25

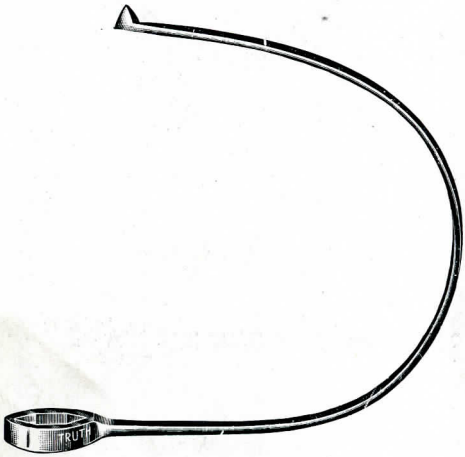
Buick Valve Spring Compressor



When springs are broken, saves taking off head of motor. No other compressor will equal it for the price.

Price $3.35

Buick Main Bearing Bolt Holder



Price $1.40

Buick Bushing Extractor

Same style and construction as Ford size found on page 20.

Price $2.00

Buick Piston Bushing Tool

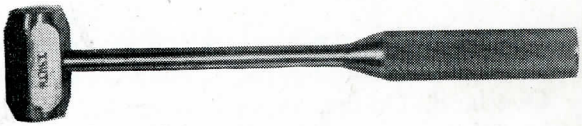
See Page 19 for picture of tool

Price $2.00

Rush Piston Ring Extractor

Price, Car or Truck size $1.40

Brass Hammer



An excellent soft hammer. Weighs about one pound. All steel handle.

Price $1.15

Hammer alone, without handle ..... .90

Bearing Scraper

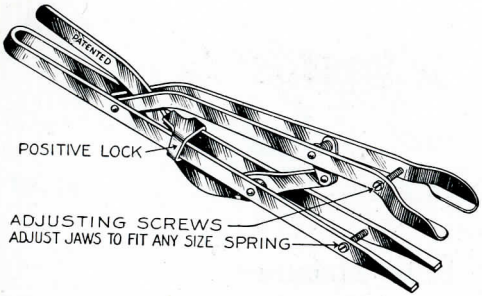
Price $0.75

Dash Hole Shearer

Cuts a hole through the dash for installing heaters.

Price $4.25

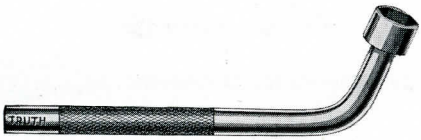
Sunnen Valve Lifter



The Sunnen valve lifter has proven a very satisfactory and practical tool. Its popularity is greater than any other make. It has adjustable jaws, parallel lift, positive lock and fits a very large number of cars, including the Cadillac, Cole, Olds, Baby Overland, Dodge, as well as trucks and light tractors. The upper jaw is adjustable to fit any valve springs.

Price $1.85

Dodge Generator Wrench

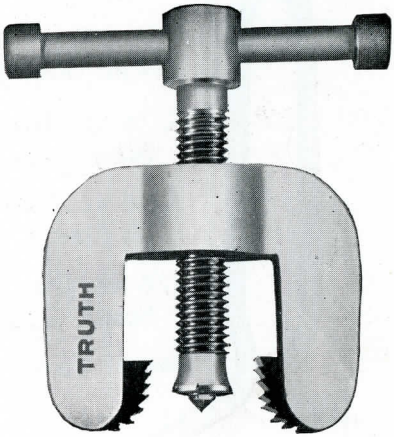


Price $0.95

Dodge Terminal Wrench

Price $0.75

Battery Terminal Puller

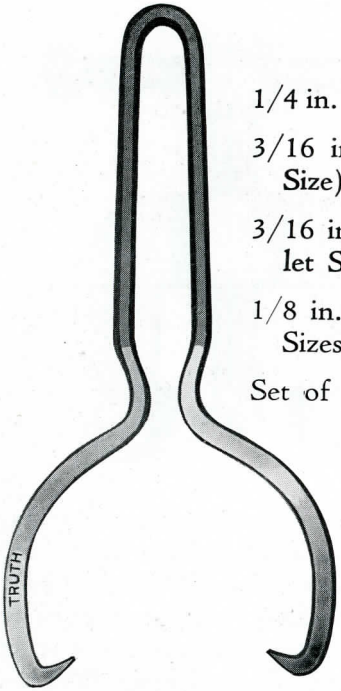


This tool is designed so it automatically grips the sides of the connection and will not let loose. The harder you screw the harder the teeth will bite into the terminal. It is the smallest connection puller manufactured and will get into places where you could not work a larger puller. In operating push it down on the connection and screw the forcing bolt against the terminal post which locks the tool permanently to the connection.

If the tool is kept in a solution of soda water there never will be trouble with corrosion. Dogs are manufactured from special steel which corrosion will not affect.

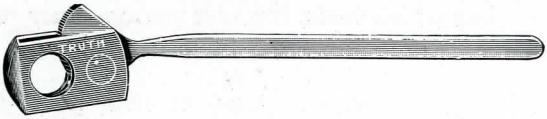
Price $3.50

Ring Groove Cleaners



1/4 in. (Ford Size)	$0.80
3/16 in. (Buick Size)	.80
3/16 in. (Chevrolet Size)	.80
1/8 in. (For Small Sizes)	.80
Set of Four	3.00

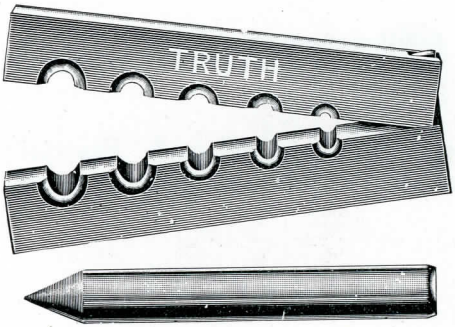
Stud Bolt Wrench



Hand drawn from special tool steel. Works on eccentric and absolutely guaranteed not to slip. Fits on any size bolt up to ½ inch in size.

Price $1.75

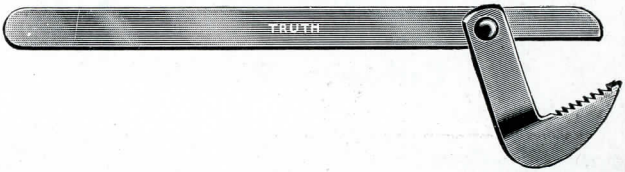
Pipe Swage



Perfect tool for making new gas and oil line connections. Holes are drilled in one side so tool will act as jig when boring holes in bolts for cotter keys. A double purpose tool.

Price $2.00

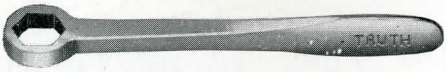
Pump Nut Wrenches



6 inch $1.25

11 inch 1.50

Nash Lock Nut Wrench



Made from high grade tool steel. Especially designed for late model Nash cars on lock nut valves.

Price $0.75

Nash Pump Nut Wrench

Made to last a lifetime.

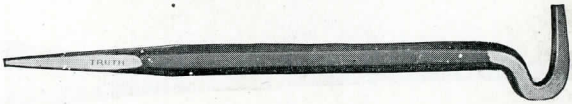
Price, each $0.40

Dozen 4.50

Carburetor Wrench

Price $0.85

Connection Rod Tool



Used to remove lugs from tie rod or connecting rod between spindle arm and steering rod. Also good for taking out grease retainer caps and felt washers in Ford rear wheels.

Price $1.25

Chevrolet Main Bearing Wrench

Made in two sizes—for 1923 and previous models and 1924-1926 models. When ordering, designate model wanted.

1923 Model $1.50

1924-26 Model 1.50

Essex Head Bolt Wrench

Same style and construction as Chevrolet main bearing wrench.

Price $1.40

Square Shank Screw Drivers

Round, highly polished tool steel blade with square shank near handle so wrench may be used when necessary. Made of one piece of steel with stock square through handle. Genuine sole leather washers pressed on over square stock making it absolutely impossible for handle to turn. Double nutted at top to stand abusive hammering. One of the most durable and strongest screw drivers ever manufactured.

Truth Gear Pullers

We have experimented with different type gear pullers for a good many years, but not until this year have we put a puller of our own manufacture on the market. Up until this time we were unable to find a simple constructed tool which would be within the reach of the average mechanic to buy; however, we have now developed that puller and from the illustrations on the opposite page it is very plain to be seen that Truth pullers are very simple in construction and have a relatively lower price than the pullers that are more complicated and have a larger number of parts.

Our pullers are manufactured from a grade of steel especially noted for its toughness and durability. The jaws are hand forged and all parts, excepting the bolts and rivets, are made from this special grade of steel and they are made from drill rod steel.

The entire puller is made in our plant and carries the usual Truth guarantee, but from the large number of pullers in use up to this time, not a part has ever had to be replaced, so there is no question but what the quality of the tool is beyond dispute, and due to the fact that there are only three parts to this puller the price is extremely low for the quality of the material used.

The extra large puller is made from 1 inch square steel with a jaw spread of 20 inches.

The large puller is made with four sets of jaws which are interchangeable—narrow jaws, wide thin jaws, cap screw jaws and Ford special jaws. The latter jaws are to pull the high speed disc drums on the Ford transmission.

Truth Gear Pullers

Extra Large Gear Puller

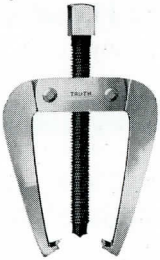
1 in. stock, 20 in. jaw spread $19.50

Large Gear Puller (Interchangeable Jaws)

May be purchased with one or more sets of jaws.

With one set of jaws	$8.00
With two sets of jaws	10.00
With three sets of jaws	12.00
With four sets of jaws	14.00
Jaws in pairs	2.00

Baby Gear Puller



With one set of jaws $3.50

York Socket Wrenches

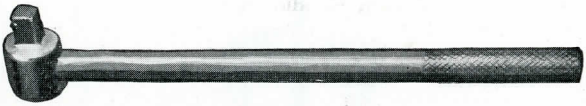
The original York Socket Wrench marked a long step in advance in the mechanical world—and was welcomed as a "life saver" by every mechanic fortunate enough to secure one.

The improved line, as now manufactured, is even more efficient. As will be seen by the large cut on the opposite page, our combination set consists of a wide range of universal sockets and straight sockets with speed handles.

These improved Socket Wrenches interchange with other standard makes having ½ inch square handle connections. This means that York SOCKETS fit other makes of handles and York HANDLES fit other makes of sockets.

The following pages give prices, descriptions, etc., of the various sets.

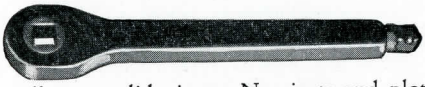
York Offset Handle, No. 430



York Offset Handle No. 430; 10 inches long and ⅝ inch diameter. Like other York products—built for service.

Price **$1.00**

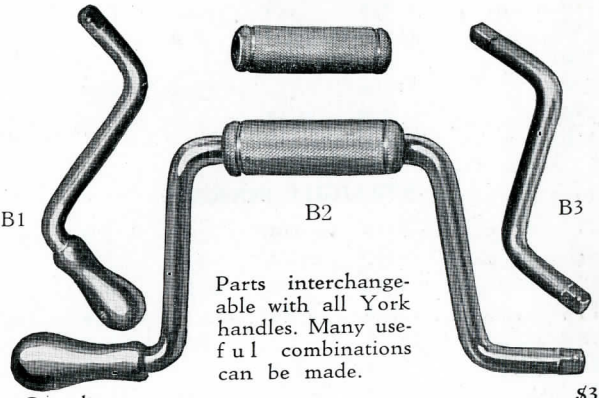
York Ratchet, No. 420



Head and handle one solid piece. No rivets and plates to weaken it. Eight inches long and may be extended with any York handle bar. Its construction enables operating in less space. Guaranteed strong enough to twist off a half-inch square steel bar.

Price $3.25

York Knockdown Brace Handle, No. 425



Parts interchangeable with all York handles. Many useful combinations can be made.

Price Complete $3.00
Prices of separate parts B1 1.30
B2 1.10
